

Globalization challenges the enterprise to demonstrate ethics an integrity in business dealing, operations and outsourcing of activities. Organizations that objectively demonstrate social responsibility against the expectations of stakeholders provide confidence to customers, investors, communities and consumers.

Issues that relate to discrimination, forced labor, child labor, adverse work environments, *et al* quality of life, which includes "green" initiatives, financial, legal obligations and contractual requirements... not only within social responsibility extending to accountability, are essential from investors to consumers.

BRS provides the competence and impartiality for your enterprise to objectively demonstrate social responsibility accountability (SRA, CSR). Through SRA certification, based on internationally recognized systems, the enterprise may fuse with accredited ISO 14001, ISO 9001, or other systems that associate to "International Labour Organisation, ILO" jointly with Human Rights. BRS refers to these protocols for certification.

The uniqueness of BRS certification is that the system under which your enterprise is assessed is develop in view of the needs of your organization, nature of activities, risks, geographical location, market expectations *in the light* of international recognized systems Guidance ISO 26000 2010 as it progresses. The selection of the assessment team assures competence and impartiality as these need inclusive to the BRS network within social and scientific disciplines.

BRS certification is rigorous. If your organization's management system is not robust in matters of "Social Accountability | Responsibility" need not to apply.

As an international certification body with technological and social expertise, global recognition through a GlobalNet of certified professionals understands the needs of the global enterprise.

Certification Process:

1. Completion of an application...
2. Initial investigation...
3. Define the number and scope of activities, regions and products... and design for the specific needs based on contractual requirements and ISO 26000 2010
4. Phase I, verifies the effectiveness of the system implementation based acceptable and recognized social responsibility bases, operational structure, activities, operational policies, and implemented such that fulfills market expectations and legal requirements at the point of origin.
5. Phase II, is the assessment of the management system in its entirety as the scope defines as a synergetic unit.
6. Recommendation to certification to the "GlobalNet Oversight Board", "GOB" and grant of SA certification in reference to the agreed protocols such as SA8000, United Nations Programs on Human Rights, inclusive Guidance ISO 26000 as this standards progresses.
7. Phase III, provides for periodical assessments with short notice in intervals that vary 6 to 11 months with the objective to assure the effectiveness of the system.
