Assessment Protocol based current ISO/IEC 17021:

- Application—complete and application package that includes questionnaire, acceptance of the term of business and a quote (fix term commitment, long term budget)...
- Phase I—initiates the certification protocol to assess adequateness and readiness progression to the Phase II. This Phase I includes an assessment of adequacy review, verification of internal controls, management review, adherence to legal obligations and regulatory matters.
- Phase II—continues the certification protocol by an in-depth verification of the management system's appropriateness and effectiveness in accordance with international benchmarks with the objective to validate and attest for certification.
- Review of the Recommendation to Certification—to process the recommendation to assure proficiency and objectiveness integral to the certification protocol.
- Phase III—as a client-organization, enters a surveillance assessment cycle to ensure adherence to the contract agreement in protection of our client-organization base.
